

SEARG 2016

10.45: Coffee

11.20: Welcome

11.25: A Systematic Review of Maternal Effect Senescence. **Edward R Ivimey-Cook**

11.45: Does reproductive effort accelerate future reproductive senescence? **Jelle Boone Kamp**

12.05: Protein, Sex and Death in Sticklebacks. **Joshua Moatt**

12.25: Host life history shifts in response to a STI in an alien invasive ladybird. **Katie Murray**

12.45: Lunch

1.45: Direct selection for longevity in *Drosophila* males. Dan Palmer, **Dave Clancy**

2.05: Experimental evolution of lifespan during adaptation – the role of environmental heterogeneity. **Martin Lind**

2.25: Sex differences in leucocyte telomere length in a wild sheep population. **Sarah Underwood**

2.45: The influence of genetic background and experimental reproducibility in identifying longevity-enhancing compounds: *Caenorhabditis* Intervention Testing Program (CITP). **Patrick C. Phillips**, Monica Driscoll, Gordon J. Lithgow, and Max Guo

3.05: Closing discussion

3.30: Coffee
